Chairman's Message

The rapid growth of Qatar's building sector has increased the government's focus on achieving sustainable development and awareness toward environmental protection. The government has set priorities that relate to pollution, resource depletion and energy deficits.

Led by a group of professional, committed and dedicated team of experts, A to Z International Co. W.L.L will focus on studies about new knowledge in sustainability and its applications, aiming to address the environmental challenges and offer innovative solution that position Qatar as the capital of sustainability development in the gulf region.

Developing new strategies based on local needs while leveraging international best practices is a definite advantage, especially for regions where environmental, economic, social, and cultural conditions are unlike other areas in the world.

With the support of our business and governmental partners, A to Z International Co. W.L.L., will provide the framework by which Qatar will achieve its sustainable development aims and support the global effort to meet the needs of the present without compromising the ability of future generations to meet their own.

Ali Khalifa Kh Kh Al- Suwaidi

Chairman

PORTA CABIN

DEMOUNTABLE OFFICE CONTAINER

The containers are preferred to their low cost and fast building process. These containers having un-welded construction technique and containers are made of high quality galvanized structural steel; its exterior surfaces are plated with pre-painted galvanized trapeze steel plates laminated with film.

Our standard containers are built without using black steel plate, DKP steel plate or welding. The galvanizing process is an important and necessary process to ensure the steel material to be stainless, therefore these containers never rust. The galvanizing process makes the containers endure to all kinds of weather elements and enjoys a long service life. Most of the containers built by other companies are welded at the joints end and it will catch rust by time being.

Instead of welding, a bolt and nut system is used on the joints in our containers. This construction technique ensures the containers to be sturdier. The same system will enable easy dismantling and re-assembling in low cost and consuming minimum time. The floors of these containers are made of natural cement plates (fiber cement) which are fireproof, endure to weather element and water and its containing no asbestos. As a result, these containers are endure to earthquake, can be built and shipped in short lead times so that our valuable customers can enjoy a long service life, economical and rust -free.

We are proud of sharing the difference and superiority of these containers with professional users and end users and providing them with high quality products and services. Thanks to the advanced building technology we employ.

GENERAL TYPES OF CONTAINERS

Module System Container

This type of container can be used as single storey or duplex office, prefabricated construction site, mess hall, dormitory, prefabricated military facility, toilet, shower room, warehouse, etc.... It can be custom-built for special purposes too.

Sandwich Panel Container

Built of highly insulated Rock Wool, Polyurethane (PUR) or Polyisocyanurate (PIR) panels, these types of containers especially good for areas where weather elements are severe. These containers are generally used as office, dormitory, mess hall, construction site, military facilities, toilet, shower room, warehouse, etc...

Demountable container

This type of container needs much lesser room during shipment and is easy to transport.

Classification in terms of model

Demountable container - toilet container, shower container, office container, security checkpoint container.

PREFABRICATED FIRE RATED PORTACABINS

We are presenting supreme quality Portable Site Offices, Portable Cabinets, Portable Guard Hut/ Cabins, which are easy to install, high quality, safe and cost efficient. Our offered ranges are highly appreciated by the customers throughout the GCC for their features like dimensional accuracy, excellent finish and low maintenance. These are beautifully designed from internally to make hygienic ambience. We use premium grade and certified raw materials to give a better finish and longevity.

Our activities include designing customized retail outlets to suit the requirements and budget of the clients as per the specifications provided by them. The cabins available with us offer the customers comfort and functionality, and provide them with a practical working environment. These cabins are durable and avail no maintenance cost after installation.

We Manufacture

- Porta Guard Huts / Cabins
- Portable Office / Site Office
- Prefabricated Cabins / Rooms
- Prefabricated Kitchens
- Portable Toilets / Bathroom

Advantages

- Free from Corrosion
- Free from Leakages
- Free from Algae
- High strength to weight ratio in comparison with MS / RCC
- Fire Proof
- Water Proof
- Sound Proof

SECURITY CABIN

Backed by skilled professionals, we are instrumental in providing a comprehensive range of Security Cabin that is facilitated with all the basic and modern amenities like proper lighting, air conditioner, furniture etc.. While designing this cabin, we make use of the best quality raw materials keeping in mind the latest market trends. Before delivering this cabin to our clients, our professionals thoroughly test this on various parameters to ensure its flawlessness. These Security Cabins can be easily shifted and reused at different locations and can withstand adverse weather conditions.

The Security cabins are available in both un-welded structure system and welded structure system.

Features:

- Sturdy design
- Excellent finish
- High strength
- Durability

Ex Stock Sizes / Un-welded Structure System Security Cabins are available in standard sizes

- 1.35mtr x 1.35mtr
- 1.5mtr x 2.1mtr
- 2.1mtr x2.1mtr
- 2.6mtr x 2.6mtr

Technical Specification of Un-welded Structure System Security Cabin.

- External wall height: 2430mm
- Outer and inner Covering: 0.40mm thick PPGI sheet RAL 9002
- Insulation: 50mm thick Rockwool with 100kg/m3 density
- Flooring: Galvanized U section cold formed profiles covered with 16mm fire rated and moisture resistant fiber cement board.

TOILET UNIT

Our ablution and sanitation units are built to facilitate various quantities of people. They are hard wearing and durable in all aspects of build quality to insure minimal maintenance. Ablution units can be specially built to separate both men and women as well as built to house only toilets (WC) or shower cubicles. As with all our units, they are built with quality, endurance and can be customized to cater for any particular environments or locations. They can be designed to house only toilets or only shower units, whichever is more preferential to our clients for their practical needs. Our ablution units have a septic tank incorporated in the build and concealed within the design. Available with European and Asian WC, exhaust fan, mirrors and toilet paper holder as standard. We use a GRP or polymer laminated waterproof flooring made from fiberglass up to a 1 meter height in showers and 30cm in all other areas. Water heaters with hot water as well as cold water supply with mixers. Units for disability access also available.

FABRICATION

- Asset inspections

DESIGNING & PRINTING

DESIGNING

In our lab we can prepare individual graphic designs. Our team of graphic designers will advise and create what your imagination suggests. We prepare a visualization of a company logo, catalogue, folder, and even large banners. Graphic design is our passion, and thanks to the technological support, access to the best software on the market we are able to realize any, even nonstandard designs. In addition, we advise and assist in the implementation of each project, advise on selecting the appropriate materials to be used. Thanks to our graphic arts the client can get an original logo design of their company, interestingly designed business cards, leaflets, brochures, catalogues, as well as eye-catching exterior graphic elements – banners, signs, etc.

LABEL ENGRAVING

Engraving is a process that involves the use of computers to control machine tools to get precision marking on your part or parts. We can do engraving on orders from one piece to a thousand pieces to provided great versatility to companies who have different needs.

We are dealing with a broad range of custom engraving services like

- Stainless Steel
- Brass
- Aluminum
- Traffolyte
- Wood
- Acrylic
- Glass

You can be sure your product will be delivered in a timely mater meeting the specification you require.

SUBLIMATION PRINTING

Sublimation printing enables us to produce photo quality, printed images on a wide range of materials and products. This durable process gives clear images for

- T-Shirt
- Safety Vest
- Hats
- Mugs & Other Fabrics

LARGE FORMAT PRINTING

Large format is a popular advertising medium which is gaining popularity. It is best suited for materials that have graphic heavy designs such as posters, banners, wallpapers etc.

It creates more impact and can attract more customers because of their large sizes.

Our printing services include:

- Banner
- Sticker
- One Way Vision
- Vinyl
- Roll up
- Hoardings
- Car stickers

We specialize in wide format of print maintaining highest quality with fast turnaround times and at very fair price. We handle your large format print job very carefully from concept, design, and print to delivery.

UV PRINTING

UV HD printers look similar to the existing printing technology but it uses a specially formulated ink containing a photo 'initiator' that when exposed to UV light converts the ink into a solid polymer and adheres it to the media.

This special curing process has several benefits. As this special ink can bond to a huge number of surfaces, we can directly print on any surface you throw in like;

- Acrylic
- Glass
- Ceramic
- Tiles
- Wood
- Aluminum sheet
- Metal
- Foam Board

LASER CUTTING

Laser cutting has changed the way that businesses and artists create custom products. Using a high powered, our laser cutting services make it possible to cut different types of materials with pinpoint accuracy, providing curves, edges with short span time period and details at any scale according to the requirement of customer services for the following.

- Acrylic
- Traffolyte Sheet
- Wood
- Leather
- Paper etc.

LASER MARKING

We have several laser marking technologies in use that can cover most requirements demanded by the various industries.

Laser marking is creating permanent marking by removing the coating from objects without metal penetration, engraving & cutting out labels. Laser marking is effective on metals and nonmetals. Our experts help to make it more professional and quality assurance with the requirement of customer interest

We offer with wide range of customized products like.

- Stainless Steel
- Brass
- Aluminum
- Traffolyte
- Plastic
- Wood
- Acrylic
- Glass
- Non-Woven Fabric etc.
